

Candidates With Recipient History

Please note that other than for ACS National Awards that are given for broad, career-long achievement, an individual who previously has received a national ACS award may be nominated for a different ACS award only if the latter nomination is for work that is clearly different from that recognized by the initial award or at least five years has elapsed since the previous ACS award was received. (The nomination letter must address the differences between the work cited as the basis for the initial ACS award and that presented in the current nomination documentation.) The prior receipt of an ACS award does not exclude an individual from being nominated for another national award provided that those requirements are met. In your consideration of the nomination documents, we ask that you take into account the recognition of the achievements below.
