

Candidates With Recipient History

Please note that other than for ACS National Awards that are given for broad, career-long achievement, an individual who previously has received a national ACS award may be nominated for a different ACS award only if the latter nomination is for work that is clearly different from that recognized by the initial award or at least five years has elapsed since the previous ACS award was received. (The nomination letter must address the differences between the work cited as the basis for the initial ACS award and that presented in the current nomination documentation.) The prior receipt of an ACS award does not exclude an individual from being nominated for another national award provided that those requirements are met. In your consideration of the nomination documents, we ask that you take into account the recognition of the achievements below.

Award Year: 2017

Award Name: E. V. Murphree Award in Industrial and Engineering Chemistry:2017

Award Nominee	Year	Award Name
Donna Blackmond	2016	Gabor A. Somorjai Award for Creative Research in Catalysis:2016
Award Citation		For fundamental kinetic and mechanistic studies that help to bridge the gap between heterogeneous and homogeneous catalysis of organic reactions.
Nicholas Peppas	2014	ACS Award in Applied Polymer Science:2014
Award Citation		Nicholas Peppas is awarded the ACS Award in Applied Polymer Science for his pioneering work on development and implementation of polymeric hydrogels for biomedical applications.
