

Candidates With Recipient History

Please note that other than for ACS National Awards that are given for broad, career-long achievement, an individual who previously has received a national ACS award may be nominated for a different ACS award only if the latter nomination is for work that is clearly different from that recognized by the initial award or at least five years has elapsed since the previous ACS award was received. (The nomination letter must address the differences between the work cited as the basis for the initial ACS award and that presented in the current nomination documentation.) The prior receipt of an ACS award does not exclude an individual from being nominated for another national award provided that those requirements are met. In your consideration of the nomination documents, we ask that you take into account the recognition of the achievements below.

Award Year: 2017

Award Name: Ernest Guenther Award in the Chemistry of Natural Products:2017

Award Nominee	Year	Award Name
Martin Burke	2013	Elias J Corey Award for Outstanding Orig Contr. in Organic Synthesis by Young Investigator:2013
Award Citation		For his development of MIDA boronates into a simple, flexible, and fully automated platform for the synthesis of complex small molecules, including several major polyene
Bradley Moore	2013	Arthur C. Cope Scholar Awards (36-49):2013
Award Citation		Brad Moore's work combining chemical and genetic insight to exploit biosynthetic pathways has been nothing less than spectacular.
